## Introduction

The Japan Seamen's Medical Affairs Corporation (JSMAC) is a legal corporation under the Minister of Land, Infrastructure and Transport. It commenced as a corporate juridical person in August of 1981. The JSMAC is essentially constituted by 21 member Japanese shipping companies in overseas services.

The main function of this Corporation is to enable Japanese and foreign seamen of JSMAC member who are aboard ocean-going vessels to work together in good health. Its main service is the devising of adequate systems for medical care and health administration.

As a part of this function, in order that seamen who are sick or injured may be able to receive trouble-free medical attention in the principal ports of foreign countries, we are promoting the drawing up of memorandums concerning medical treatment, with the specific medical service organizations (including dental services) which may be relied upon in these ports.

Moreover, along with the above, in order that Japanese seamen who are unfamiliar with local conditions may come to a mutual understanding with the medical organizations at the time of their hospitalization or upon receiving treatment a person is being appointed as intermediary who is able to act as an interpreter for the Japanese language.

This intermediary is a resident representative who belongs to the shipping companies of JSMAC member. In the case in which there is no such a resident representative, JSMAC will appoint a Japanese who resides in that locality or a local person who speaks Japanese is requested to cooperate in a voluntary spirit as an intermediary.

This booklet was compiled from 1981 to the end of May of this year, for the above described purpose. A detailed table and utilization summary has been compiled containing medical organizations and intermediaries which have been arranged for.

Thus, we hope that the booklet will serve the seamen aboard member ships, medical organizations, intermediaries, local agent staffs and other parties concerned with the detailed information contained therein.
