

1.malaria	5
① Causal pathogen of malaria	6
② Fate of Plasmodium parasite in human body	7
③ Epidemic range of malaria infection	8
④ Present status of malaria infection in JAPAN	10
⑤ Route of infection	11
⑥ Latent period	12
⑦ Clinical symptoms	12
⑧ Laboratory findings	13
⑨ Treatment	14
⑩ Prophylactic drugs of malaria	17
⑪ Medication period of prophylactic drug	18
2.Dengue fever/Dengue hemorrhagic fever	21
① Causal pathogens	22
② Afflicted areas and epidemiology	23
③ Route of infection	25
④ Present status of dengue fever and its risk of infection in the future Japan	26
⑤ Present status of dengue fever in non-afflicted areas	27
⑥ Type of dengue viral infection	28
⑦ Clinical symptoms	28
⑧ Pathogenesis of dengue viral infection and laboratory tests	30
⑨ Diagnosis	31
⑩ Treatment	31
⑪ Prevention	32
⑫ Seamen in relation to dengue fever	32

3. Yellow fever	35
① Recent case reports on yellow fever	36
② Pathogenic virus and epidemiology	37
③ Epidemic range of yellow fever virus	38
④ Route of infection	40
⑤ Clinical symptoms	40
⑥ Diagnosis	41
⑦ Treatment	41
⑧ Prevention	41
⑨ Vaccination	42

4. Chikungunya fever	43
① Chikungunya virus and its vectors	44
② Epidemiology	44
③ Route of infection	45
④ Clinical symptoms	45
⑤ Laboratory tests	46
⑥ Prevention	46
⑦ Overseas travel in relation to Chikungunya fever	47
